Service Request Form (Billing info REQUIRED to perform service)

Please fill out this form completely. Dry injectors and package them carefully by wrapping each injector in a paper towel or cloth. Be sure to keep o-rings and spacers on injectors so we can match with new ones. Finally enclose injectors in a sealed plastic bag. Please note that if there is any fuel odor coming from the parcel, it will most likely not be delivered.

Ship the completed "Service Request Form" with the injectors to the address listed above.

SERVICE REQUESTED (check all that apply)

- Flow Test Only (\$7.00 per injector)
 Injectors are visually inspected, numbered and flow tested using Pro Flows state-of-the-art ASNU machine. Prepare a test report with results. No parts are changed.
- Complete Pro Flow Service (as low as \$22.00 per injector* Side-Feed as low as \$24 per injector) - *Includes Flow Test*
1. Injectors are externally cleaned, visual inspected, and numbered.
 2. Test injectors for resistance, shorts, and current draw.
 3. Perform leak test, spray pattern, and flow rate testing on our state-of-the-art ASNU Machine. We then record the results.
 4. Remove filter baskets, o-rings, and pintle caps. Bead-blast any loose paint and rust from the metal injector body.
 5. The injectors are cycled through the ASNU ultrasonic cleaning tank to remove any particles and dirt for 45 minutes.
 6. A high pressure back-flush is done to remove any particles inside.
 7. Back to the flow bench for retesting of spray pattern, flow rate, and leak checking. This test data is also recorded
 8. Install new filter baskets, o-rings, and pintle caps. (as required, some additional charges may apply)
 9. Prepare a comprehensive test report with before and after test data. The injectors are then packed along with the old parts for return.
- * Injectors requiring excessive cleaning, customer will be contacted as additional fees will apply.*

- Standard Shipping (\$12)
- Express Shipping (\$39)
